alexandregonzalezrodriguez

Shopa

UK

Developer

Oct'14–Cur.

I am working with Go and Rails applications to build a social marketplace. The organisation of this company is completely flat so the decisions about architecture or technologies are delegated to us. I am as well working with integration with some external companies.

Green Man Gaming

UK

Engineering Manager

Apr'13–Oct 2014

On this position I am having the chance of see the projects growing from the beginning. I am in charge of architect them with the team and keep track that all the task are being done properly and later, merge them. I develop too every time that I have occasion and of course, I continue doing peer reviews.

I was developing mainly with the Python and Golang languages, using several DB backends: CouchDB, Redis, MySQL, PostgreSQL and several frameworks as could be: Flask, Django or Revel.

Green Man Gaming

UK

Software Engineer

Dec'12–Apr 2013

I was working in the several services that the company has to provide the shopping and social networking (we own playfire.com too) experience. Those services were mainly writing in Python, Scala and NodeJS. I was giving support in the CI and testing environment that we were growing at that time. Part of my work was doing code-reviews too.

Paylogic

Netherlands

Developer

May'11–Nov 2012

Backend developer creating a new RESTful API (Python, flask, PostgreSQL, celery...) that will be the entry point between mobile applications and all the Paylogic services and social networks.

Sometimes I am working directly in Paylogic's backoffice where I had the chance to use backbonejs apart of Django and others.

lukkum

Spain

Technology responsible

Apr'10–Jan 2011

Web platform and REST API development, management consulting and secondary IT works. All this project was created from scratch by me and I've decided to go with Python related technologies: Django, django-piston, celery...

mirblu S.L.

Spain

Founder

Mar'09–Apr 2010

Development in several languages: Python, PHP, Java, Bash Scripting and Visual Basic. Customer search. Business administration works.

The main project of the Company was an indoor position system created with J2ME technologies. The project was selected as one of the best I+D projects of Castilla y León.

PC Carrier & Caja Duero Foundation
